

Hi There,

I am an XM subscriber and I enjoy it very much. In my job I travel about 100,000 miles a year by vehicle. I enjoy the weather and traffic reports offered by XM and they help me with my travels. I enjoy all of the continuous programming and it is such a relief NOT to have to put up with the mindless prattle that seems to be spreading thru the broadcast bands. It is my choice to subscribe to the service and I do. I am in my 50's and I VOTE in every election, check the local voter rolls. I see nothing wrong with XM and it is well worth what I PAY for it and it allows me to hear what I want to hear, no some one else's idea of what they think I want to hear. I DON'T need any more help from the government or any of its agencies.
